

Microelectronics: Wireless Technology and MEMS in the Developing Countries

Filesize: 7.83 MB

Reviews

*Completely among the finest ebook We have at any time read through. it was actually writtern really properly and helpful. You are going to like just how the writer compose this publication.
(Mr. Deangelo Considine)*

MICROELECTRONICS: WIRELESS TECHNOLOGY AND MEMS IN THE DEVELOPING COUNTRIES

Daya Publishing House, 2007. Hardcover. Book Condition: New. The publication entitled Microelectronics: Wireless Technology and MEMs in the Developing Countries brought out by the Centre for Science & Technology of the Non-aligned and Other Developing Countries (NAM S&T Centre) is largely based on the presentations made during the 5th International Workshop on Microelectronics: Wireless Technology and MEMS: held at Kuala Lumpur, Malaysia during September 2005.;Microelectronics is the cornerstone of the information technologies that pervade virtually every aspect of contemporary life. It is difficult to imagine any field of science or technology that has had a more profound impact on the latter half of the 20th Century than microelectronics. Microelectronics industry has been able to provide transistors, chips and products that are becoming smaller, faster, cheaper and better every year. As transistors become smaller, they become faster, more and more of such transistors can be packed on a chip, and thus chips are able to store and process more information. In microelectromechanical systems-the microelectronics, microfabrication and micromachining technologies, collectively known as MEMS -is being applied to biomedical application and has become a new field of research unto itself, known as Bio-MEMS. The technology is originally based upon the same technology is originally based upon the same technology that has been used to make computer chips ever more powerful and less expensive.;This volume contains contributions from renowned experts and status reports on the subject from several developing countries, viz, Cuba, India, Indonesia, Malaysia, Mauritius, Nigeria, Pakistan, Philippines, Sri Lanka, Tanzania and Turkey. The complied information will facilitate the developing countries in working out appropriate plans and strategies to exploit new technologies and research results for prosperity of the masses.;;Contents;Chapter 1: Biomems and their Applications by Vinod Kumar Jain; Chapter 2: Indian Initiatives in MEMS and Related Technologies: A Survey by S Nirmala;...
