RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1891 edition. Excerpt: . . . and the nymph Pleione. In our diagram we show the 14 principal stars, as seen with an opera glass; also, the names of the entire family. Aicyone is 1 (eta) of Taurus. The position and the magnitudes of these stars are very difficult to be identified from the catalogues and maps published at different times, Fig. 90. -The 14 principal Pleiades. As our object is to describe the heavens as they are now, we have given the position, the names and the magnitude of the Pleiades for the year 1ss0; the amateurs who wish to go deeper with the study of this interesting group can refer to M. Flammarions book, Les Etoiles, pages 2s9 to 306. Messrs. Paul and Prosper Henry, after taking the photograph of the Pleiades on the 16th of December, 1ss5, discovered a bright nebula starting from Mala, going a little west, then turning abruptly toward the north and measuring about 3 minutes; they photographed the same region again on the 16th of November, the 5th and 9th of December, 1ss5, and the 5th of January, 1ss6, and the nebula was visible on the plates each time; still, in looking through all the telescopes of the Paris Observatory they could not see it; it was identified later at Pulkova Observatory (Revue dAst. , 1ss6; page 45). In 1s59, Mr. Tempel, of Marseilles, discovered at Venice, the 23d of October, 1s59, a nebula starting from Merope, which he thought was a comet; he saw it...
